

National CSR Conclave 2.0 - 2026

CSR – Policy – NGO Convergence for Swasth Bharat

Mental Health, Lifestyle Disorders & Preventive Oncology
25th April 2026, Venue:- Hotel Sayaji, Vijay Nagar, Indore, Madhya Pradesh

About the Conclave

The Society for Awareness and Transformation for Youthful Aspirations (SATYA), supported by corporate CSR partners, is hosting the **National CSR Conclave 2.0** in Indore, Madhya Pradesh. The Conclave envisions a future where healthcare responsibility goes beyond charity, becoming a strategic investment in human well-being – blending modern medical science with India's traditional healthcare wisdom to make a meaningful contribution to sustainable and preventive healthcare for all.

Concept Note

Bharat faces a deepening health crisis. Mental health concerns, lifestyle-related disorders, and cancer are increasingly burdening individuals, families, workplaces, and communities, driving premature deaths and productivity losses. CSR initiatives provide resources, policy offers structure, and NGOs reflect community realities. Their convergence can transform isolated efforts into systemic change, creating sustainable, scalable health ecosystems.

Key Challenges

- NGOs grasp community needs but often lack scaling frameworks, digital tools, and monitoring systems.
- Corporates bring CSR funds yet struggle with sustainable models aligned to Schedule VII outcomes.
- Policymakers craft strategies but require field-tested proofs to strengthen programs like the National Mental Health Programme.

Aim

To create pathways for **Evidence-Based Intervention Design**, ensuring that every CSR rupee and every NGO effort is guided by data, proven models, and measurable outcomes. This year's Conclave advances further to promote structured convergence among Corporates, Policymakers, Healthcare Institutions, and Civil Society to achieve scalable, measurable impact in healthcare.

Thematic Verticals

- **Vertical I:** Mental Health and Emotional Well-Being
- **Vertical II:** Lifestyle Disorders
- **Vertical III:** Preventive Oncology

Expected Outcomes

A visible shift from fragmented projects to integrated district ecosystems school mental health programs, community lifestyle clinics, and cancer screening pathways via public-private-NGO models. Madhya Pradesh will pioneer a **replicable convergence blueprint for a Swasth Bharat**, powered by healthy youth.

Why Indore?

- Indore is a leading industrial and commercial hub in Madhya Pradesh with strong CSR presence.
- Access to corporate leadership
- Academic and medical institutions
- Proximity to underserved tribal and semi-urban districts

Target Participants

- Corporates, CSR Heads & Corporate Foundations
- State Health Department Officials
- Public Health Experts & Oncologists
- Mental Health Professionals
- NGOs & Social Enterprises
- Academicians, Research Scholars and Students

About SATYA

The Society for Awareness and Transformation for Youthful Aspirations (SATYA) is a non-profit, development-oriented organisation committed to sustainable and inclusive social transformation. SATYA integrates traditional knowledge with modern approaches to build sustainable, self-reliant communities capable of addressing contemporary socio-economic and environmental challenges. It empowers change through awareness, competency-building, skill development, and collaborative partnerships.
